

RETENTION YOU CAN RELY ON

Vivera retainers
now accommodate
bonded lingual
wires and pontics

Strength Makes a Difference

- The proprietary clear thermoplastic material in Vivera retainers is 30% stronger than other leading clear retainer materials

Other leading clear materials demonstrate failures within two months*

Competitor's retainer showing cracks that occurred after three weeks of nighttime-only wear.

Helps Prevent Relapse

- The superior strength enables them to self-correct (back to final retained position) certain types of relapse that may occur during Vivera retention, up to .25mm per tooth
- Regular replacement keeps patients in strong working retention

Patients Will Wear It

- Survey data shows 8 out of 10 patients are extremely or very satisfied with Vivera retainers overall
- Its firm, comfortable fit helps encourage compliance
- Easy to replace if lost

Enhances Your Efficiencies

- Four sets of retainers work with your treatment philosophy
- The first retainer is shipped to the doctor; remaining retainers are shipped to doctor or patient
- No repeat visits means reduced chair time and less potential for patient dissatisfaction

Order Vivera Retainers

- Log into your VIP account page to place your order today

"With Vivera retainers, we can just take an impression and send it out. We don't have to worry about pouring models or doing any lab work."
